

Instructions for Sending Virtual Exhibits for SESCAL 2022

Your exhibit should be scanned so that each page is a separate image file. Preferred format is JPG (JPEG) at 300 dpi (at least). Other formats and files can be handled. If you want to use another format, please contact Webmaster, Lois Evans for further instructions.

The images will appear on our website in the order you specify when you name the files. Name your image files in a manner which makes clear the order in which to show them.

The total size of the image files for almost all exhibits is greater than can be sent by email. You can attach them to several emails. If you wish to send them with the least effort, there are several alternatives. Its OK to use one you are familiar with. We encourage you to use the WeTransfer service to send the files. This is a simple site to use and it will allow you to send up to 2 GB of files at one time. There is a short YouTube video, <https://youtu.be/gmzMsSCKj4E>, which shows you how to use WeTransfer to easily send multiple files. You may enter up to 3 email addresses to receive the files you send.

Please send your exhibit images to the Exhibits Chairman, Howard Green at howbetgren@aol.com, and Webmaster, Lois Evans at sescal.lois@gmail.com. When your images have been received and verified, you will be sent an email confirming their receipt.
